DETAILED ACTION

1. Claims 1, 3-7, 9-13, and 15-18 are allowed.
2. Claims 2, 8, and 14 have been cancelled.

REASONS FOR ALLOWANCE

3. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to teach the following limitation: 'obtaining a training set of objects; presenting a user with one or more subsets of objects based on the training set of objects, each subset comprising at least two objects of the data set; receiving user feedback regarding similarity between the one or more subsets of objects; defining one or more sets of feature variables based on features in the one or more subsets of objects; defining one or more class variables in accordance with the user feedback; and constructing a similarity function which relates the one or more sets of feature variables to the one or more class variables: wherein each of the sets of feature variables is defined by a pairwise subtraction of the features in the corresponding subset of objects' as recited in independent claim 1 and similarly recited in independent claims 7 and 13.

As per claim 6, the prior art of record does not teach 'wherein the similarity function is constructed for subsequent use in automatically determining the similarity between two or more objects of substantially unknown similarity' and similarly recited in independent claims 12 and 18.

Art Unit: 2167

The remaining claims 3-5, 9-11, and 13-17 comprise dependent claims, thus these claims are patently distinct over the art of record for at least the above reasons.

The examiner agrees with the applicants' remarks, filed on May 2, 2005, page 7 lines 4-19.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

CONCLUSION

4. The prior art made of record and not relied upon is considered pertinent to Applicant's disclosure.

A. Matheny et al. (Pat. No. 5,517,606) discloses an object-oriented menuing system using command objects of an object-oriented operation system; and

B. Kavanagh et al. (Pat. No. 5,838,965) discloses an object oriented database management system.
